6 countries

DRC, Cameroon, Madagascar, Guinea-Bissau, Niger, Burkina Faso

25,000+

community health volunteers mapped

17,600+

community health workers trained and deployed

WHO WE ARE

A Congolese firm working to international standards

Axiom Santé SARL was founded in Kinshasa in 2026 by public health physicians and epidemiologists who have led monitoring and evaluation systems, surveys and community health programmes for over fourteen years.

The firm combines a small core team with a network of experts: epidemiologists, statisticians, health economists, qualitative specialists, pharmacists, biomedical engineers and data specialists.

Figures: combined experience of the team's experts, gained with United Nations agencies, international NGOs, ministries of health and Axiom Santé.

WHO WE WORK FOR

Clients and partners

Ministries of health

United Nations agencies

International and national NGOs

Bilateral and multilateral donors

Foundations

International consultancies (consortium, subcontracting)

EXPERTISE

Six areas of expertise

01

Research and evaluation

- Baseline, mid-term and final evaluations
- Impact and theory-based evaluations
- Household and health facility surveys
- Qualitative studies, operational research

02

Monitoring and evaluation (MEAL)

- Theories of change, results frameworks
- MEAL plans, indicator reference sheets
- Data quality assessments (DQA)
- Third-party monitoring (TPM), accountability

03

Health systems

- Situation and performance analyses
- Costed strategic and operational plans
- Community health, health financing
- Health products, human resources

04

Project design

- Call analysis and go / no-go decisions
- Concept notes and technical proposals
- Logframes and M&E plans
- Institutional capacity assessments

05

Training

- Project cycle and results-based management
- M&E and data quality
- Mobile data collection and analysis (Excel, Stata, R)
- Data use for decision-making

06

Digital health and data

- Mobile data collection (SurveyCTO, ODK, Kobo, CommCare)
- Mapping and GIS (QGIS)
- DHIS2, dashboards (Power BI)
- Decision-support tools, AI with human review

THEMATIC AREAS

Programmes we know from the inside

- Community health
- Malaria, HIV, tuberculosis
- Maternal and child health
- Immunisation
- Nutrition
- Epidemics and emergencies
- Health financing
- Health products

REFERENCE STANDARDS

Methods aligned with international standards

- OECD DAC evaluation criteria
- UNEG Norms and Standards for Evaluation
- Research ethics principles, ethics committee approval where required
- WHO health systems frameworks

APPROACH

Rigour, context, usefulness

01

Frame

Inception note, evaluation matrix, stakeholders.

02

Measure

Mixed methods, pre-tested tools, real-time quality control.

03

Analyse

Reproducible analysis, triangulation, stated limitations.

04

Drive decisions

Prioritised recommendations, feedback, action plan.

REFERENCES

Measurable results in the field

Assignments led by the team's experts, before or outside Axiom Santé. Clients not named for confidentiality; certificates available on request.

COMMUNITY HEALTH · BURKINA FASO

Scaling up community-based health workers

Technical support for training, deployment and follow-up of health workers with district teams, for a national programme supported by an international technical partner.

17,652 workers trained and deployed

DIGITAL HEALTH · GUINEA-BISSAU, NIGER

Geo-referenced mapping of community health volunteers

Methodology design, geo-referenced mobile data collection, quality control and atlases for coverage planning by ministries of health.

Over 25,000 volunteers mapped

OPERATIONAL RESEARCH · BURKINA FASO

Contribution of community health workers to malaria case management

Protocol, data collection and analysis, and scientific writing on the share and quality of case management provided by community health workers.

Published in a peer-reviewed journal

DRC

Multi-province MEAL systems

Surveys, baseline and mid-term studies, operational assessments of health facilities.

DRC
